PROFILE

Israel is a highly skilled mobile app developer (Flutter) that is able to create well-optimized hybrid mobile apps for iOS, Android operating system and web apps. Skilled and versatile in the use of test-driven (TDD), clean architecture, domain-driven design (DDD) and SOLID design patterns. A proven team player with a passion for collaboration and integrated ways of working to achieve business goals. Seeking a mobile app developer position with a high-growth organization that offers opportunities for career advancement.

RELEVANT WORKING EXPERIENCE

2019 – Present   Senior Mobile App Engineer
Realo Technologies LTD, Lekki Peninsula, Lagos.

- Working as a mobile app engineer with the Olevelgurus team, building technologies that support the education system in Africa.
- Developed and deployed an Edutech app (the Olevelgurus app) on the play store with a fast-growing user base using the Flutter framework and applied standard software engineering design principles. The Olevelgurus app features an online student community where students get help on their assignments, assist other students, and join virtual classes scheduled on the app.Develop backend APIs for mobile apps.
  Olevelgurus App available on play store
- Developing backend Rest APIs for mobile apps using PHP and python-flask.
